

The voice messages are in English until the first device is paired, the unit will then adopt the language of the Bluetooth device paired.

Bluetooth 1st connection

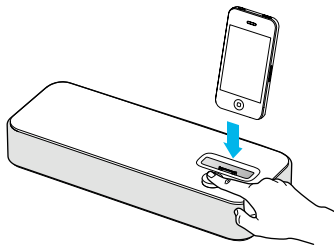

With iOS 6, be sure your Bluetooth is activated first.

- For Alcatel-Lucent Bluetooth deskphones, iOS and Android smartphones and tablets, long push the volume button until you hear a sound signal. A «Pairing mode: waiting for connection» message allows you to pair your Alcatel-Lucent 8125 Audiooffice in your device Bluetooth menu. A final sound confirms the pairing.

Multiple connections: Pairing a new device / Reconnect a device

With iOS 6, be sure your Bluetooth is activated first.

- For Alcatel-Lucent Bluetooth deskphones, iOS and Android smartphones and tablets, push the volume button until you hear a sound signal. A «Pairing mode: waiting for connection» message allows you to pair your Alcatel-Lucent 8125 Audiooffice in your device Bluetooth menu.
- Connecting a previously paired device is easy from its Bluetooth menu. The last connected device is the one in control and disconnect the others.

Disconnect a paired device

- Long push the volume button until hearing a double-sound signal. The last connected device is then unpaired and the auto-connection is stopped. A «Disconnecting» message and sound signal confirms the disconnection.

Unpair all the connected devices

- Long push the volume button until hearing a three-sound signal. A «Clearing all subscriptions» message confirms it.

Also forget the Audiooffice from your device Bluetooth menu in order to complete future pairings between these devices.
